Why Now, More Than Ever, You Need a Massage

While you may be tempted to trim your wellness budget when economic times are tough, now more than ever, massage should play a role in reducing stress and strengthening the health of Americans.

When you feel your best, you are more likely to be able to face the challenges difficult times present. With greater health and peace of mind, you can face difficulties with poise, clarity of purpose, and strengthened emotional reserves.

Truly, massage is more than a luxury--it's a vital part of self-care that has a positive ripple effect on us as we work, play, relax, live life, and care for others.

reducing the risk of stress-related illnesses, massage also boosts immunity, helping you fight colds, flu, and other viral infections.

Following is a sampling of a long list of bodywork benefits:

- EASE ANXIETY.
- REDUCE THE FLOW OF STRESS HORMONES.
- IMPROVE SLEEP.
- BOOST THE IMMUNE SYSTEM.
- BUILD ENERGY LEVELS.
- REDUCE FATIGUE.
- FOSTER CONCENTRATION.
- INCREASE CIRCULATION.
- DEVELOP SELF-ESTEEM.
- REDUCE FREQUENCY OF HEADACHES.
- RELEASE ENDORPHINS.

Look deep into nature, and then you will understand everything better.

-Albert Einstein

Massage induces a sense of grounding and calm, helping you face challenges with ease.

Invest In Yourself, Invest in Those You Love

In economically challenging times, it is vital to invest in preventative health care. The last thing you want is to get sick, have to take time off of work, and pay expensive medical bills. Staying healthy means maintaining your ability to take whatever life has to throw at you. Besides lowering stress levels and, in turn,

And if you think about it, massage is an excellent value. The price of massage has remained stable in recent years, as the cost of movies, dining out, and sports events has risen. Which of these has the power to improve your health and your outlook on life?

A Cornerstone of Health
Steer Clear of the Gym
The Power of Tea Tree Oil

Continued from page 1

The positive effects of regular massage can have far-reaching effects in many areas of your life.

At Home

Massage therapy will also help families under stress create healthier households with clear-thinking and more relaxed moms and dads. Children are very sensitive and often pick up on tension in a household; parents who are taking care of themselves are more likely to be better caregivers and provide a sense of security to their kids. This goes for caregivers of aging parents and other family members.

At Work

The health benefits of massage can help forestall illnesses and lost work time, especially when you may be asked to produce more with fewer resources. Decision-making skills will be better and your performance is likely to be improved with a clear focus and more energy.

A hint for the boss: Research shows employees exhibit less stress and improved performance when given twice-weekly, 15-minute massages in the office!

For Health Conditions

Those with already existing health conditions can continue to reap benefits in the following ways. And proactively caring for health through massage may help reduce costly doctor visits and use of prescription and over-the-counter medications.

Research shows:

- Massage can reduce sports-related soreness and improve circulation--good to know when you may be exercising more to reduce stress.

- Deep-tissue massage is effective in treating back pain, arthritis, osteoarthritis and fibromyalgia. Fibromyalgia patients receiving massage also have less pain, depression, anxiety, stiffness, fatigue, and sleep problems.

- Massage reduces symptoms of carpal tunnel syndrome.

- Oncology patients show less pain, fatigue, nausea, anxiety and depression following massage therapy.

- Stroke patients show less anxiety and lower blood pressure with massage therapy.

- Massage therapy is effective in reducing postsurgical pain.

- Alzheimer's patients exhibit reduced pacing, irritability and restlessness after neck and shoulder massage.

- Labor pain. Massage during labor appears to reduce stress and anxiety, relax muscles and help block pain. Some medical professionals believe massage also reduces tearing, shortens labor, reduces the need for medication and shortens hospital stays.

- Preterm babies receiving massage therapy gain more weight and have shorter hospital stays than infants not receiving massage.

- Massage is beneficial in reducing symptoms associated with arthritis, asthma, high blood pressure, and premenstrual syndrome.

There is now a body of research to support the benefits listed above. But there's no greater testimonial than the person who is a regular receiver of massage. The first-hand experience of bodywork clients largely echo the same sentiment: bodywork enhances quality of life, and the return on your investment is great.

While bodywork feels like a luxurious mini-vacation, and you should by all means enjoy it, there is an actual physical need for massage. Maintaining a regular massage schedule will help you operate at your peak level--whether it be at work, at home, or at play. Invest in yourself, and book a massage today.

Massage is one of the few things that provide so much pleasure while improving your health.

Steer Clear of the Gym

Take it Easy After Your Massage

Ray Bishop

When booking a massage, consider your schedule, and try to avoid any strenuous physical exertion for at least 24 hours following your bodywork session. Exercising after a session can both increase muscle soreness and compromise the value of the soft-tissue work you've just received. "Strenuous exercise" includes activities such as running, weight lifting, high intensity aerobics, or power yoga classes.

Light exercise such as moderate walking, gentle stretching, or swimming laps at an easy pace is okay for healthy individuals. One widely accepted view in favor of this twenty-four-hour recovery period is that sustained pressure on connective tissue makes it more gel-like. The technical term for this change is thixotropic effect. This state of increased softness lasts about twenty-four hours, so high-intensity exercise may pull or move the tissue back to old patterns or even induce new strain patterns.

Experts usually suggest taking it easy that evening and the following day. To further reduce any bodywork-related soreness, drink at least two liters of water in the next twenty-four hours to hydrate and flush your system. Take a hot Epsom salt bath and drink gently calming teas such as chamomile or passionflower to facilitate sleep and reduce stress that is so commonly seen as a contributing factor in chronic muscle tension and soreness. If you're dealing with an injury, the guidelines should be adjusted, but these basic suggestions seem to work well for most people.

It does appear that healthy people who exercise vigorously five to six days a week sometimes find even these modest recommendations quite challenging. If you're one of these people, consider working out before your session and then take it easy afterward.

To get the most out of your massage, hold off on the workout. When you do hit the gym again, you'll likely discover

your body is more fit than ever, thanks to the healing power of bodywork.

Take it easy and let your massage soak in.

The Power of Tea Tree Oil

Is your medicine cabinet full of ointments, oils, and creams that each treats one specific ailment? Maybe you can cut down on some of the clutter by adding nature's own wonder drug, tea tree oil, instead.

What is Tea Tree Oil

Produced in Australia from the tree *M. alternifolia*, tea tree oil acts as an antiseptic, fungicide, insect deterrent, and more. It has been used in Australia by aborigines for generations and, since the country's colonization, has spread to the rest of the world.

Tea tree oil, which can be found as an essential oil as well as in creams, ointments, shampoo, and even toothpaste, can be used to treat a staggering variety of conditions, including: acne, arthritis, athlete's foot,

burns, cuts, dandruff, eczema, gingivitis, infection, insect bites and stings, lice, muscle sprains, psoriasis, and rashes. And that's just a partial list!

Potential Benefits

The exact cause of tea tree oil's effectiveness is difficult to ascertain, and researchers are still looking into just how much the natural remedy can do for us. Newer studies have looked at its ability to stop the spread of sometimes-deadly methicillin-resistant staphylococcus aureus in hospitals.

Use Safely

While there are plenty of benefits to using tea tree oil, its strength can also be problematic, even dangerous. The Mayo Clinic advises that it's not safe to ingest or take tea tree oil internally, and it is considered particularly harmful if

ingested by pets.

Also, like most natural remedies, the US Food and Drug Administration does not regulate tea tree oil as it does other medicines, leaving no standard quality of tea tree oil products. And, while many people enthusiastically support tea tree oil, it is no substitute for professional medical care.

Yet, many people agree that, if nothing else, tea tree oil should be a part of your first aid kit in case of bites, burns, or scrapes. But who knows? You might find yourself using it for much more than that.

*The purpose of
art is washing
the dust of daily
life off our souls.*

-Pablo Picasso
